noctua

Design brief and request for quotation

Brand refresh and AEMT Conference 2026 stand collateral

1. Who we are and who this is for

> Noctuais aDutch B2Bsoftwarecompany.Our platformgives independent repair shops and asset owners a complete service history and condition picture for industrial rotating equipment: electric motors, pumps, drives and gearboxes.

The audience for all of this material is the owner or director of an industrial repair business, and the maintenance manager of a plant that owns the machines. They are technical, practical and sceptical of marketing language. They came up through a workshop. They respond to clarity, evidence and numbers, and they distrust anything that looks like a brochure.

The tone should be confident, plain and uncluttered. Think engineering instrument rather than software startup. No stock photography of people in hard hats pointing at tablets.

We are paying for design judgement, not output

We want work that a person designed. We canalready generate competent, generic material ourselves in a few minutes, and that is exactly what we are trying to get away from. If what comes back looks like it came out of a template or a prompt, it has failed the brief however quickly it arrived.

To be clear about where the line sits: use whatever tools you like for production, tracing, cleanup and iteration. We are not policing your process. What we are buying is your judgement about hierarchy, typography, restraint and what to leave out, and a result that carries a recognisable hand. We will also not accept generated illustration or photography in the final artwork.

The test we will apply is simple. Could we have made this ourselves in an afternoon? If yes, it is not what we are paying for.

The immediate reason for the work

We are exhibiting at the AEMT Conference in Manchester on 24 September 2026, on a 2 x 2 m stand. The stand collateral has a hard production deadline. The business card and signature refresh runs alongside it because the current material dates from 2023 and no longer matches how we present ourselves.

Decisions already taken, so you are not designing in the dark

- **Domain.** Allnew material carries **noctuaone.com**. Theoldcardsand signatures show noctua.info. That is being retired, so do not carry it forward anywhere.
- **Tagline.** There is one tagline and it is **From sensor to service**. Some older material still carries a different line. Strip it wherever you find it and do not carry it forward.

The one thing still open, and it is part of the job

Twocoloursystems are in circulation. The logofile uses a light violet, the printed cards use a deeper indigo, and a pastel gradient appears on the card reverse but almost nowhere else. Resolving these into one palette and applying it consistently across all nine items is part of what we are asking you to do. Propose the palette with your first concepts.

2. What exists today

Businesscards,2023,portrait55 x 85 mm

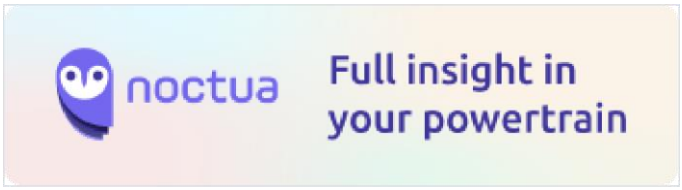

Three cards exist: Mark Ent, CEO. Martin Hemmer, IT Architect. Robert Boers, IoT lead developer. Set in InDesign, using Hind Regular and Ubuntu Medium, both free Google fonts.

They are not bad. They are simply dated, the reverse gradient does not appear anywhere else in our material, and the layout does not survive being cut down to a smaller landscape format if we go that way.

Colours as rendered from the print PDF, so treat these values as indicative rather than the source CMYK build.

Email signature, 2024

An HTML signature per person with the banner image above. Three versions exist. The archive uses a compression method we could not open here, so we will send you the original untouched.

Colours in the current material

#3E3699 Card block, indigo	**#7367F0** Logo violet	**#FDDDC4** Gradient peach	**#FBC6CC** Gradient pink	**#BDE8EE** Gradient mint

What we will send you on award

- Logo asa layered PSD, 2229 px wide. **Wedo not have a vector master.** Please price rebuilding it as vector separately, as item 9 in the quote table, and tell us if you would rather redraw than trace.
- The three business card print PDFs, InDesign origin.
- The email signature archive, original and untouched.
- Our PowerPoint template as a .potx, for reference only. Redesigning the deck is not part of this job, though it is likely to follow later.
- Print templates from the stand supplier for the banners, flags and counter, as soon as we have them.

3. The nine deliverables

> Quote eachitemseparately.Whereaspecification is missing, price your assumption and state it, rather than leaving it out.

#	Item	Specification
1	**Business cards**	Refresh of the existing design. Portrait 55 x 85 mm double sided, or propose landscape 85 x 55 mm if you think it is better and say why. Four named cards: Mark Ent, Martin Hemmer, Robert Boers and Andrew Maat, plus an editable master so we can add people ourselves. Print ready per person.
2	**Email signature**	Refresh to match. HTML signature that renders correctly in Outlook and Gmail on desktop and mobile, plus the banner image asset. Four people plus a master with clear instructions for us to edit. Keep the file weight low and do not rely on web fonts.
3	**Logo and tagline lockup**	A general use master file. Horizontal and stacked versions, full colour, all white, and single colour black. Delivered as SVG, EPS, PDF and PNG at three sizes, with clear space and minimum size rules on one page.
4	**Roll banner 1**	850 x 2000 mm visible. Carries our headline claim and proof line. Layout direction and content zones in section 4.
5	**Roll banner 2**	850 x 2000 mm visible. Carries a short headline and a large QR code that we will supply.
6	**Beach flag**	650 x 3150 mm overall, sail area per the supplier template. One design, printed twice. Logo and the tagline only, nothing else. Double sided artwork.
7	**Counter panel**	Counter is 910 x 470 x 940 mm, width by depth by height. Front panel print, logo and the tagline only. We will send the supplier template with the exact printable area.
8	**Event flyer**	A5 double sided, print ready plus a screen PDF version. Content: what the platform does, the proof number, one contact route. We will supply the copy, you own the layout.
9	**Vector logo rebuild**	Optional, priced separately. See section 2.

What matters most

Items4, 5, 6 and 7 must be press ready on Tuesday 8 September and cannot slip. The printer needs nine working days and the show is on 24 September, so there is no second attempt. Items 1, 2, 3 and 8 can follow on 19 September. If your availability only allows part of the work, tell us and quote for that part. We would rather award two designers than miss the print slot.

4. Direction for the stand pieces

> These are ourown workingsketches,included so youunderstand the constraints and the message hierarchy. They are not a layout to reproduce. We expect you to do better, and we are open on the visual approach as long as the constraints below are respected.

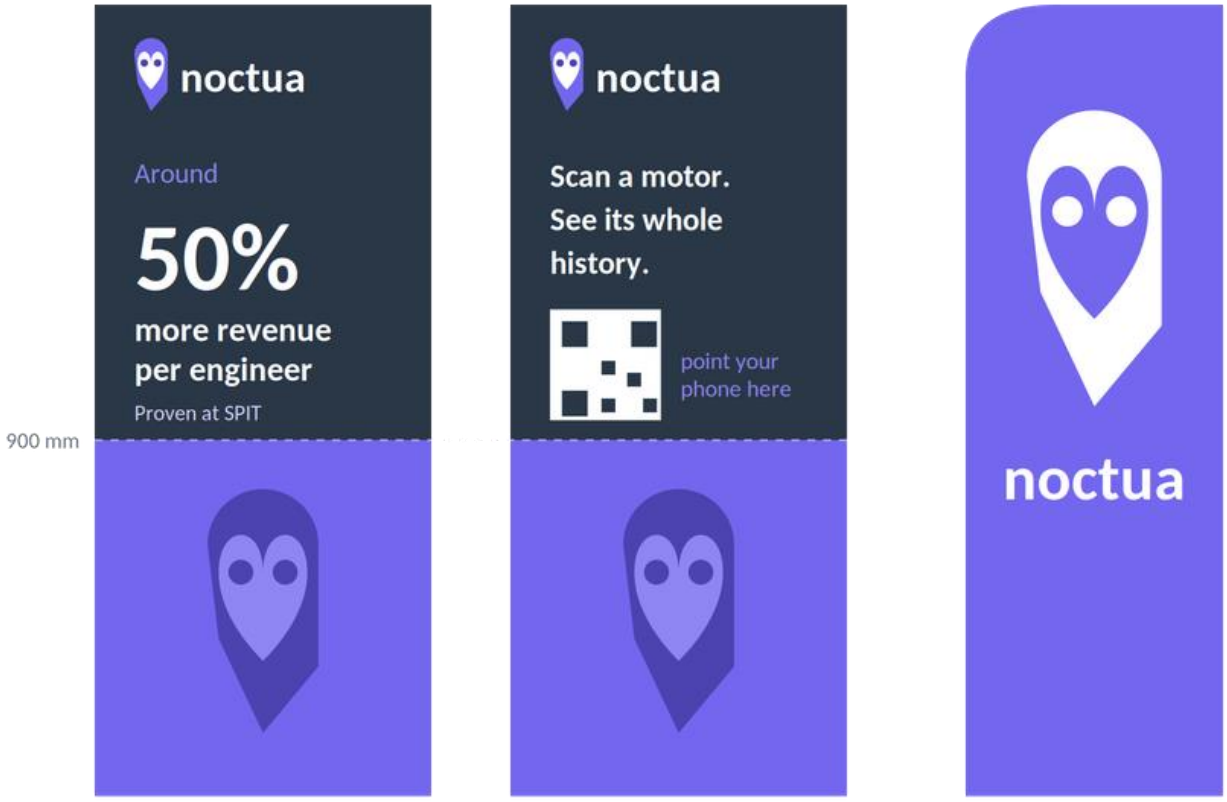

The stand seen from the aisle. Two roll banners form the back wall, a flag stands at each front corner, the counter sits in front of the left banner.

Constraints that come from the physical stand

- **Nothing readable below 900 mmon either banner.** The counter is 900 mm tall and people stand in front of the rest. Treat the bottom 900 mm as a colour field.
- **Live area on each banner is 730 mm wide** inside 60 mm side margins, and the bottom 60 to 80 mm disappears into the cassette.
- **The QR on banner 2 sits between 950 and 1230 mm** from the floor so people can scan it without crouching. Minimum 280 x 280 mm.
- **Banner 1 must read at five metres.** One idea, one number, nothing else competing.
- **The flags read at fifteen metres, in motion.** Logo and the tagline only, in the top third of the sail. Nothing below 1400 mm.

4. Direction, continued

Content hierarchy for the two banners and the flag sail. Again, a sketch of the hierarchy rather than a design.

Copy to be set, subject to final approval

Piece	Roll	Copy
banner	1 Roll	Around 50% more revenue per engineer. Supporting line and a short proof credit.
banner	2	Scan a motor. See its whole history. Plus a QR code and a short instruction line.
Beach flag		Logo and the words From sensor to service. Nothing else.
Counter panel		Logo and the words From sensor to service. Nothing else.

Final copy will be confirmed at briefing. Please do not treat wording as fixed when proposing layouts.

5. Technical requirements and handover

Print files

- Press ready PDF, PDF/X-4 or PDF/X-1a, CMYK, 3 mm bleed, crop marks on the small format items.
- Large format items built to the supplier template, at 1:1 or clearly labelled 1:10, with fonts outlined.
- Any placed raster image at 150 dpi minimum at final size for large format, 300 dpi for the cards and flyer.
- Rich black defined, no registration black in body text.

Source and working files

- Packaged Adobe source files with fonts and links, or Figma with edit access transferred to us. Both are acceptable, tell us which you work in.
- All fonts must be free or already licensed to us. The current material uses Hind and Ubuntu, both free through Google Fonts. If you propose a paid typeface, price the licence separately and name it.
- Editable masters for the cards and the signature, with a short written note on how we add a new person without you.

Screen files

- RGBPDF and PNG of the flyer and the logo lockups.
- Signature assets hosted or supplied as a single image with the HTML.

Ownership

Fullownership of all delivered artwork and source files transfers to Noctua B.V. on final payment, including the right to modify. Confirm you accept this in your quote.

Process

- One round of concepts on the stand pieces, then two rounds of revisions. Say clearly in your quote how many rounds your price includes and what a further round costs.
- We work in English. All final artwork is in English.
- Point of contact is Andrew Maat. One approver, so you will not be caught between opinions.

How we will decide

Deliverability against the 8 September date first, then relevant large format experience, then price. We are not looking for the cheapest quote. We are looking for the one that will be finished on time and will not need us to chase it.
