Walk Up Creates. Walmart Completes.

A new retail category for completing life's most important errands.

30-MINUTE INTRODUCTION

Meeting objective: earn the next conversation with the Walmart decision-makers who can evaluate a new services category.

America Has a Completion Problem

CATEGORY PROOF

People know what they need to do. Too few actually finish.

The challenge is not awareness. The challenge is completion.

3 OUT OF 4

Americans lack a will

Estate planning is the clearest proof point of a broader national completion gap.

HUMAN PAPERWORK IMAGE

Family at kitchen table; laptop, folders, calendar, unresolved life admin.

Life’s Most Important Errands Have No National Platform

BIGGER THAN WILLS

- Estate Planning
- Family Protection
- Caregiving
- Business Formation
- Retirement Readiness
- Document Organization

Nobody owns completion.

Why Physical Matters

FOUNDER TRUTH

The founder truth behind the category.

The internet solved information.

You can learn almost anything online.

The internet improved transactions.

You can buy almost anything online.

But life still happens in person.

Birth • Death • Marriage • Divorce • Caregiving • Aging parents • New homes • New businesses

HUMAN COMPLETION MOMENT

Adult child helping parent; couple reviewing documents; real service counter interaction.

Important life moments may start digitally. They are completed physically.

The Challenge Is Completion

THE BROKEN MILE

The broken mile begins after the customer has already decided to act.

Most digital solutions stop here.

Walk Up owns the finish.

Completion is where customer intent becomes a finished household task.

Print • Sign • Witness • Notarize • Store • Update

Most Companies Help Customers Start. Walk Up Helps Them Finish.

COMPETITIVE CONTRAST

TRADITIONAL MODEL

Search → Form → PDF

Customer is left alone to finish.

ABANDONED PDF

Unfinished document / customer alone

WALK UP MODEL

Interview → Pathway → Completion

The customer leaves with something important finished.

COMPLETED DOCUMENTS

Finished, signed, witnessed, stored

Completion is the product.

Why Walmart × Walk Up

PARTNERSHIP LOGIC

The trusted place meets the completion system.

WALMART PROVIDES

Trust
Traffic
Convenience
Proximity
Physical presence

WALK UP PROVIDES

Completion Kiosks™
Guided workflows
Completion Teams
Permissioned context
Partner distribution

Together: a new category of customer engagement.

Why Walmart Wins

WALMART VALUE

This is Walmart’s opportunity—not merely Walk Up’s distribution plan.

New Customers

A new reason for households to choose Walmart.

Existing Customer Growth

Completion reveals relevant needs before the basket exists.

Return Visits

Signing, handoff, follow-up and update visits.

Household Relationships

Walmart becomes relevant at important life moments.

Category Ownership

Nobody owns completion today.

Completion Kiosks™ can deepen relationships with the households Walmart already serves—and attract new ones.

Customer Needs. Walk Up Connects. Walmart Completes.

The simple mental model Walmart should remember after the meeting.

MEDITATIVE FRAME

CUSTOMER NEEDS

A life event.
A responsibility.
A need.

WALK UP CONNECTS

The household to the right completion pathway.

WALMART COMPLETES

The experience in a trusted physical place.

Customer Need → Completion Pathway → Walmart Completion

The Customer Need Interview

PRODUCT MOMENT

Permissioned context begins with a trusted reason to answer.

PRODUCT SCREENSHOT

Polished Customer Need Interview UI. Show 3–4 readable questions, progress, reassuring language.

The customer voluntarily explains:

Household stage
Dependents
Caregiving duties
Business needs
Document readiness
Urgency

Customers tell us what they need because we are helping them finish something important.

Life Events Create New Demand

RETAIL INSIGHTS

Purchases are effects. Life changes are causes.

TRADITIONAL RETAIL INTELLIGENCE

Past purchases
Basket patterns
Promotions
Substitutions

Predicts more of the same.

HOUSEHOLD READINESS INSIGHTS

Life events
Household transitions
New responsibilities
Preparedness gaps

Reveals new categories of need.

Walmart already knows what customers bought. Walk Up helps reveal what changed.

The Completion System™

OPERATING LOGIC

A simple causal system—not a second business.

The kiosk creates the visit

A convenient reason to enter the store and begin.

The life event creates urgency

Something important must be solved.

The interview creates context

The household explains what it needs now.

Completion creates trust

The customer leaves with something important finished.

Trust creates long-term value

Future updates, services, referrals, and household relevance.

Most retailers acquire transactions. Walk Up earns household relationships.

Why Walk Up

TEAM + PROOF

Built by operators who have lived the completion gap in the real world.

Operating Proof

7,000+ families served
~$3M annual revenue
National referral relationships
AI-enabled completion infrastructure
Estate-planning expertise + retail execution

The company

Walker Estate Planning: real client interactions and operational legal experience.
Walk Up Innovations: AI-enabled completion infrastructure for retail settings.

The advantage

This was not invented in a lab. It came from watching families repeatedly fail to complete important life tasks.

Estate-planning expertise + retail execution + AI efficiency

Accessible for Families. Sustainable for Everyone.

ECONOMICS FRAME

A simple retail economics framework designed for high-traffic, low-friction conversion.

$367	~70%	~1.7/day	2.5/day	0.025%
Illustrative base basket	Gross margin before central overhead	Break-even completed households	Base-case paid completions	Traffic capture of 10,000 visitors

Customer Acquisition

High-traffic placement lowers dependence on paid acquisition
In-store discovery + targeted awareness
WEP and institutional partners can direct incremental households

Labor Model

1 person available during every store hour
3-person Completion Team
Available 3 days/week, 8 hours/day
Labor scaled to demand

Affordability + Cash Flow

Consumer-friendly pricing
Flexible payment options
Qualified third-party financing available
Immediate cash realization for Walk Up

Use only validated numbers in the agency build. Detailed model stays in presenter backup, not the main story.

The opportunity is not another service.

The opportunity is to define where households complete life’s most important errands.

People can begin almost anything online.
When something truly matters, they still want a trusted place to finish it.

NEXT STEP

A working session with the Walmart leaders responsible for services, store operations, customer experience, and strategic partnerships.

Walk Up Creates. Walmart Completes.

APPENDIX

Appendix A — Unit Economics

Working model for agency layout; keep backup, not main-story clutter.

Metric	Working value	Definition	Use in deck	Agency note
Average sale	$367	Illustrative base basket	Main Slide 14 headline metric	Validate final mix before external send
Gross margin	~70%	Before central overhead	Shows model sustainability	Do not overstate as audited
Break-even	~1.7/day	Completed households/day	Simple operator proof	Keep as approximate
Base case	2.5/day	Paid completions/day	Shows upside vs break-even	Avoid full forecast in main deck
Traffic capture	0.025%	Of 10,000 daily visitors	Shows low conversion burden	Use as simple intuition

Speaker position

These are working economics for agency and Q&A backup—not a request for rollout approval.

CFO hygiene

Every externally shared number should tie back to one integrated model and assumption register.

APPENDIX

Appendix B — Product Mix + Revenue Bridge

Shows how the customer-friendly offer can support the average sale assumption.

Product path	Mix	Initial price	Weighted $	Notes
Will / basic bundle	35%	$79.99	$28	Entry wedge; keep accessible
Enhanced package	25%	$175	$44	More complete document path
Trust / legacy package	25%	$499	$125	Higher-value pathway where appropriate
Professional escalation	10%	$1,000 net	$100	Licensed operator / attorney pathway
Print, notary, storage, add-ons	5%	$1,400 net	$70	Completion services + add-ons
Illustrative initial basket	**100%**	**—**	**$367**	**Tie to Slide 14 average sale**

Agency direction

Do not make this look like a price sheet. Make it a “revenue bridge” showing how affordability and completion paths reconcile to the average basket.

APPENDIX

Appendix C — Affordability + Financing Structure

Third-party financing protects Walmart pricing value prop and improves Walk Up cash flow.

Customer sees

Consumer-friendly entry pricing
Flexible monthly payment options
Lower upfront friction

Financing partner does

Underwrites qualified customers
Funds receivable / payment plan
Carries financing risk under agreed structure

Walk Up gets

Immediate cash realization
Reduced receivable drag
More predictable contribution margin

Issue	Without financing	With 3P financing	Walmart benefit	Agency wording
Affordability	High upfront cost	Payment flexibility	More accessible service	“Designed for access”
Cash flow	Delayed collections	Upfront funding	Better operator stability	“Immediate cash realization”
Credit risk	Operator exposure	Shifted to finance partner	Limited retail burden	“Qualified financing”
Value prop	Could feel expensive	Price feels Walmart-friendly	Preserves mass-market fit	“Remove completion barriers”

APPENDIX

Appendix D — Store-Level Operating Model

Shows the agency what must be visualized behind the simple economics story.

Cost / capacity item	Working value	Type	Notes
Launch / kiosk capex	$110k–$145k	One-time	Hardware, enclosure, signage, install, training, launch setup
Monthly fixed cost	$16,150	Fixed opex	Rent/space, software, connectivity, support, insurance, local marketing
Completion Team	3 people	Labor model	Available 3 days/week, 8 hours/day; scaled by demand
Coverage approach	1 available/store hour	Customer support	Positioning language needs final operational check
Variable cost / household	Model input	COGS	Printing, notary/witness, payment processing, support, review, fulfillment
Break-even formula	Fixed cost ÷ contribution margin	Math rule	Use contribution margin, not gross revenue

Agency direction

This appendix should look like an operator-ready cost stack: simple enough for executives, detailed enough for finance to see the model is not hand-waved.

APPENDIX

Appendix E — Company Proof + Agency Finish List

What the agency should polish, replace, validate and finish before distribution.

Company proof

7,000+ families served
~$3M annual revenue
Established estate-planning operator
National referral relationships
AI-enabled completion infrastructure

Leadership / team

Kent Walker — founder/operator
Edra Walker — operations + retail lens
Joshua Hime — communications
Advisors / legal / marketing support
Add final headshots and titles

Do not change

15-slide main arc
No pilot ask
No VC language
No dense forecast in main deck
Closing asks for working session

Agency task	Owner	Status	Notes
Replace all image placeholders	Agency	Open	Use licensed Walmart/service/family photography or approved renderings
Insert founder/team photos	Founder + agency	Open	Use professional headshots; keep bios short
Validate will statistic	Agency/founder	Open	Do not distribute source-free
Reconcile final model numbers	Founder/CFO	Open	One model must drive all appendix numbers
